THE CONFERENCE

The Mid-Pacific Region Water Users' Conference is an annual conference attended by Managers, Directors, O&M Personnel, Consultants, and Government Agency Representatives from districts served by the United States Bureau of Reclamation facilities in California, Nevada, and Oregon.

OPTIONAL ACTIVITIES

USBR PRIVATE MEETINGS

The U.S. Bureau of Reclamation Management Team and Water Conservation Team will be available for private meetings during the conference. Questions or to arrange meetings in advance, please contact the following:

- U.S.B.R. Management: Alene Thomas (916) 978-5000 or athomas@usbr.gov
- U.S.B.R. Water Conservation: Anna Sutton at (916)978-5214 or asutton@usbr.gov (*see enclosed flyer*)

WORKSHOP: TECHNICAL ASSISTANCE FOR MODERNIZATION OPTIONS (SCADA, flow measurement, automation, monitoring, canal control, reservoirs)

*Thursday afternoon (approx. 3:30). Immediately following the conclusion of the General Session, Dr. Stuart Styles of Cal Poly ITRC will hold a workshop open to all interested parties. The ITRC has been providing technical assistance through the USBR over the last 2 decades. Through the partnership, the ITRC serves as a valuable extension to the in-house expertise of federal and state agencies and irrigation districts. ITRC's qualified senior technical experts and engineers assist these agencies in making proper design and modernization decisions, and conduct rapid appraisal process evaluations which quickly — often in two weeks or less — determine key indicators of irrigation projects. The ITRC program will target the benefits of direct technical assistance to individual irrigation and/or water districts in the Sacramento Valley and the San Joaquin Valley. A variety of training and technology transfer programs will also be provided. The ITRC provides independent expertise for specific water conservation programs for individual irrigation districts. The workshop will cover the technical topics that the ITRC supports and solicit input from the participants for **potential new projects and training opportunities**. The new Irrigation Turnout Calibration Unit will be available in 2018. The unit has a 6,000 gpm (over 12 CFS) capacity and is portable to help with SB7x7 compliance. There will be opportunities to get your turnouts checked in the Summer of 2018.*

Join us on Wednesday afternoon for a private screening of "BEYOND THE BRINK" in the Eldorado Showroom.
